Story

Number:	STRY0058970	State:	Defining
Product:	App Tech Engineering Engagement	Percent complete:	20
Product Product Manager:	Jason Valentin	Priority:	4 - Low
Catalog Item:		Type:	Development
Theme:		Classification:	Feature
Epic:		Extract Classification:	
Impacted Products:		Sprint:	September
Requested by:	Shayla Gibbs	Points:	20
Assignment group:	AIT Application Technology Architecture	Blocked:	false
Assignee:	Zafrulla Khan	Blocked Duration:	
Peer Reviewer:		Waiting on User:	
QA Assignee:		Need By Date:	09-08-2026 08:04:13 AM
Testing completed:	true	Product rank:	
Tested by:		Project phase:	
Tested date:		Project:	
Additional assignee list:			

Blocked reason:

Short Description:

LogTag Online

Description:

Description: Implement LogTag Online with Wi-Fi-enabled data loggers at select AHMG Urology clinics to provide real-time notification when medication storage temperatures move outside established parameters. The solution will supplement existing temperature-monitoring processes by enabling clinic leaders to respond promptly to power outages or temperature excursions.

Region: RMR
Facilities: None
Used by: Practice managers
Request: Design and Resourcing

Acceptance criteria:

Validation plan:
